NovoZil AlertMe

INSTALLATION GUIDE

Introduction

NovoZil AlertMe is a cloud-based service designed to provide real-time security and system health monitoring through seamless Syslog message processing. This solution consists of two key components: the NovoZil AlertMe Agent and the Cloud Portal.

The NovoZil AlertMe Agent runs on the client's network, receiving Syslog messages from various devices and filtering relevant security and operational events. These filtered messages are then securely transmitted to the NovoZil Cloud Portal. The portal not only provides an intuitive interface for monitoring Syslog alerts but also enables instant notifications via SMS, email, or Telegram, ensuring that IT staff members stay informed of critical events in real time. The key benefits are;

Enhanced Security Awareness: Stay informed with real-time alerts and SMS/Text, email, or Telegram notifications, ensuring immediate awareness of security incidents and device health.

Efficient Management: Simplify administrative tasks with a multi-tenant architecture, making it an ideal solution for Managed Service Providers (MSPs) or Managed Security Service Providers (MSSPs) overseeing multiple client environments.

Hassle-Free Setup: Experience zero-touch deployment with the NovoZil AlertMe Agent, which automatically configures itself, reducing setup time and effort.

Seamless Scalability: Grow your business effortlessly with NovoZil's scalable multi-tenant architecture, supporting expansion for both end customers and MSPs.

This installation guide provides step-by-step instructions to help you deploy and configure NovoZil AlertMe efficiently. Follow the guidelines to ensure a smooth setup and maximize the benefits of this powerful monitoring solution.

System Requirements

To ensure optimal performance, the following system requirements must be met:

Operating System	: Windows 10 or Windows 11 (x64)
Memory	: 8GB RAM or more
Software Dependencies	: .NET Microsoft Windows Desktop Runtime 8.0.14

Pre-Installation Checklist

Before proceeding with the installation, ensure the following:

- ✓ Your system meets the required hardware and software specifications.
- ✓ You have administrative privileges to perform the installation.

Installation

Follow these steps to install the NovoZil AlertMe Agent on a Windows 10/11 host:

1. Download the Installer: Ensure you have the latest version of the NovoZil AlertMe Windows Installer Package.
